REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claim 1 and it associated dependent claims, the prior art of record [for example US patent 6474712 or US 2003/0071952 A1] teaches a display device comprising: a first sub-pixel, wherein the first sub-pixel divided into a first domain and a second domain; a second sub-pixel, wherein the second sub-pixel is adjacent to the first sub-pixel and divided into a third domain and a fourth domain; and a third sub-pixel, wherein the third sub-pixel is adjacent to the second sub-pixel and divided into a fifth domain and a sixth domain [the first, second and third pixel are not all shown but are taught; they are other pixels in the matrix]; wherein the first electrodes and the second electrodes are parallel to each other in each pixel [see the figures]. The prior art of record does not teach in combination with the limitations supra "the first electrodes are below the second electrodes in the first, fourth and fifth domains, and the first electrodes are over the second electrodes in the second, third, and sixth domain."

Regarding claim 7 and it associated dependent claims, the prior art of record [for example US patent 6474712 or US 2003/0071952 A1] teaches a display device comprising: a first substrate, wherein the first substrate includes a first, second, third, and fourth domains, arranged in a matrix, the first domain and the second domain are parallel in the same column, the third and the fourth domains are in the same column, the first and the third domains are in the same row, the second and the fourth domains are in the same row; a gate line, wherein the gate line extends along a first direction on the first substrate; a first data line, wherein the first data line extends along a second direction on first substrate; a plurality of TFTS, wherein the TFTS are on the matrix and connected line and the gate line; a plurality of first electrodes, wherein the first disposed to the first data electrodes are first, second, electrodes, wherein the second respectively formed in the first, second, third and fourth domains; respectively formed the third and fourth domains, and a plurality of second electrodes are wherein the second connected to the electrodes are electrically TFTS. The prior art of record does not teach in combination with the limitations supra "the first electrodes in the second and third domains are respectively

Art Unit: 2871

electrically connected to the first electrodes in the fourth and first domains, wherein the positions of the first and second electrodes are the same in the diagonal domains, and the positions of the first and second electrodes are reversed in the adjacent domains."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
